REASON FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art of record (O'Malley) fails to teach a method for testing a conference server for use in a telephone network, the conference server having a plurality of duplex channels, each channel including an input to the conference server and an output from the server, the method comprising the steps of: generating a plurality of unique test tones; applying a different one of the plurality of test tone signals to each one of the plurality of conference server inputs; selectively combining at least some of the test tone signals within the conference server to generate a plurality of test output signals corresponding in number to the conference server inputs and coupling the test output signals to selected ones of the conference server outputs; analyzing the conference server outputs to identify which of the plurality of test tone signals are present within the conference server outputs; and providing an error indication in the event at least one of the test tone signals detected within the conference server outputs does not correspond to a corresponding expected test tone signal as claimed and substantially connected in claims 1-15 and shown in (see figs.).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
